Sunnyside Valley Irrigation District to Repair Leak, Service to be Interrupted

Due to a substantial leak in the irrigation system, Sunnyside Valley Irrigation District (SVID) informed City Staff that they will be shutting down irrigation service to Prosser on Monday, April 21, 2014. Repairs will begin immediately upon shutting down of the system. SVID expects to have the line back up and primed by April 22, 2014, however users may notice low pressure for a couple days after the repairs are completed. "We appreciate SVID's advance notice and hope that it will not inconvenience the City's users too much. It's good that SVID caught the problem and are making repairs while the temperatures are still mild," stated Mayor Paul Warden.

If you do not have irrigation water or continue to experience low pressure after repairs are made and the line is fully pressurized, please contact the City at (509)786-2332.
